Career Objective

Driven by a passion for learning and a commitment to skill development through practical experience. Eager to grow in the web development field and contribute to a dynamic environment where I can apply my dedication, creativity, and expertise to help achieve organizational goals.

Skills

Expertise: HTML, CSS, Tailwind CSS, JavaScript, React, Firebase.

Comfortable: Material UI, Express JS, MongoDB, Next.js, JWT.

Tools: Figma, Visual Studio, GitHub, Vercel, Netlify.

Projects

1. Petopia

[Live site](#) || [Client](#) || [Server](#)

A platform to connect individuals for pet adoption. Users can browse or list pets for adoption and contribute to donation campaigns.

Key Features:

- Browse a wide range of pets for adoption or list your own pets, making it easier to connect with adopters.
- Explore and contribute to donation campaigns aimed at supporting adoption efforts and animal care.
- Authenticated users can manage pets and donations, while admins oversee platform activities to ensure a secure experience.

Technology: JavaScript, React, Firebase, Node js, Express js, MongoDB, JWT, Stripe

2. Service Scope

[Live site](#) || [Client](#) || [Server](#)

This Service Review Website serves as a platform for users to discover, share, and manage services along with their reviews.

Key Features:

- Discover a variety of services and read detailed reviews to make informed choices.
- Add new services to expand the catalog and enrich the platform.
- Share reviews, manage your feedback, and customize your added services as an authenticated user.

Technology: JavaScript, React, Firebase, Node js, Express js, MongoDB, JWT

3. Movie Sphere

[Live site](#) || [Client](#) || [Server](#)

Movie Sphere is a web app that allows users to seamlessly upload, update, delete, and view detailed information about movies. It provides a straightforward and efficient platform for managing movie-related content.

Key Features:

- Browse top-rated movies on the Home Page or explore the full collection on the All Movies page. View detailed information with a click.
- Add, edit, or manage your favorite movies with private routes, requiring login for secure access.
- Quickly find movies by title using the search feature on the All Movies page.

Technology: JavaScript, React, Firebase, Node js, Express js, MongoDB
